

## Editorial Line

The editorial line of the Scientific Journal – “**Rev. Cient. Multidisciplinar UNIFLU**” is focused on the electronic dissemination of researches and scientific initiation produced at the “Centro Universitário Fluminense UNIFLU”, in the institutions that are partners in the Norte Fluminense Region, and throughout the Brazilian national territory. As a multidisciplinary periodical, it covers all the fields of human knowledge.

Initially devoted to dissemination of the scientific initiation produced at the institution of origin itself, which covers researches that are self-financed and institutionally financed, and those financed by research funding agencies such as CNPq and FAPERJ, have attained adhesion by professors and students of other teaching institutions in other States and Municipalities of the Brazilian Federation.

Created in 2016, it has periodicals published uninterruptedly every six months, currently in its third year and with five issues, initially published in the e-mail address. [www.uniflu.edu.br](http://www.uniflu.edu.br) with two numbers, and as from 2017 at the present address, [ojs.revistamultidisciplinar.uniflu.edu.br](http://ojs.revistamultidisciplinar.uniflu.edu.br)

At present it has five numbers published in the Portuguese Language, and as from the next volume, the intention is to publish a percentage of the articles in the English Language as well, in accordance with the rules of the qualitative assessment and indexing bodies, such as CAPES, with a view to extending visibility and bibliometric analysis.

The purpose of the significant changes this periodical have undergone has been to meet the demands of assessment bodies, which represent the scientific community in the systematization, communication and promotion of research and scientific initiation. With the goal of constant improvement, it will continue to promote endeavors to increase the quality and visibility of the production contained in its publications.
